Hawaii CKMR 2026: agenda v1

Mark Bravington & Eric Anderson, July 2026

These are the items to cover. However, exactly what happens when is flexible; we will have to see how it goes with timing. The 3 extra workshop days after the end of the "formal" course, will offer a chance to delve more deeply.

Mon 9 Nov

Intro: principles, scope, workshop overview

Parent-Offspring Pairs (POPs): simple marine mammal example & model

Gotchas #1: because nothing is ever *that* simple...

Tue

Half-sibling Pairs (HSPs): shark example

Gotchas #2: ... and HSPs are a rich source of gotchas

And so to fish: basic CKMR-driven fish model

Genetics and kin-finding #1 Principles

Wed

Missing/uncertain data: usually this means age

Fish: a semi-realistic model. ¿The 3rd loop?

Case study #1: School sharks

Kin-finding and genetics #2: Worked examples

Thu

Case studies #2: Southern Bluefin Tuna

DESIGN #1: so important!

Case studies #3: WAtlantic BFTuna and/or bearded seals

Fri

DESIGN #2: worked example

Spatial CKMR: the wild west

Sat or Sun

Things we missed...

Project/topic deep dives: TBD during workshop

Mon 16 Nov

More deep diving

Tue

More deep diving
